## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5, 6, 10-12, 17, 18, and 22-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Hofmann (US 6,241,701).

Hofmann discloses a device (figs. 1-3, 8-9b, 18a-18b, but better seen in figs. 18a-18b) and having a shaft 1810, a control structure 1812 to be connected to the instrument control, at least one injury effector and at least one therapeutic-substance delivery effector at 1822 at the distal end of the shaft. The at least one injury effector may not contain therapeutic-substance delivery capabilities (col. 22, lines 30-55), and is not in substance relationship with the at least one therapeutic-substance delivery source (col. 2). Support for all the dependent claims and claim 33 can be found in US Patents incorporated by reference in Col. 3, line 66 – Col. 4, line 3, specifically U.S. Patent 5,702,359. The '359 patent shows the plurality of therapeutic-substance delivery effectors being disposed around at least one injury effector, and in column 3 discloses that needles can be arranged in any desired length.

***Response to Arguments***

3. Applicant's arguments filed November 15, 2004 have been fully considered but they are not persuasive.

Hofmann teaches every element as claimed.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
